Blocklists

Block ads & trackers using the most popular blocklists available — all updated in real-time.

NextDNS Ads & Trackers Blocklist
A comprehensive blocklist to block ads & trackers in all countries. This is the recommended starter blocklist.
132,091 entries • Updated 2 days ago   ×

AdGuard DNS filter
A filter composed of several other filters (AdGuard Base filter, Social media filter, Tracking Protection filter, Mobile Ads filter, EasyList and EasyPrivacy) and simplified specifically to be better compatible with DNS-level ad blocking.
github.com/AdguardTeam/AdguardSDNSFilter • 103,657 entries • Updated 2 hours ago   ×

AdGuard Mobile Ads filter
Filter that blocks ads on mobile devices. Contains all known mobile ad networks.
kb.adguard.com/general/adguard-ad-filters#mobile-ads-filter • 895 entries • Updated 3 hours ago   ×

AdGuard Tracking Protection filter
The most comprehensive list of various online counters and web analytics tools. If you do not want your actions on the Internet be tracked, use this filter.
kb.adguard.com/general/adguard-ad-filters#tracking-protection-filter • 53,855 entries • Updated 3 hours ago   ×

AdGuard Base filter
Filter that enables removing of the ads from websites with English content.
kb.adguard.com/general/adguard-ad-filters#base-filter • 47,312 entries • Updated 13 minutes ago   ×

OISD
Internet's #1 domain blocklist. Blocks Ads, Mobile Ads, Phishing, Malvertising, Malware, Tracking, Telemetry, CryptoJacking, Analytics, Spyware, Ransomware, Exploit, Fraud, Abuse, Scam, Spam, Hijack, Misleading Marketing.
oisd.nl • 196,900 entries • Updated an hour ago   ×

EasyList
EasyList is the primary filter list that removes most adverts from international webpages, including unwanted frames, images and objects. It is the most popular list used by many ad blockers and forms the basis of over a dozen combination and supplementary filter lists.
easylist.to • 30,450 entries • Updated 28 minutes ago   ×

Steven Black
Extending and consolidating hosts files from several well-curated sources like adaway.org, mvps.org, malwaredomainlist.com, someonewhocares.org, and potentially others.
github.com/StevenBlack/hosts • 130,851 entries • Updated 2 days ago   ×

Goodbye Ads
Specially Designed for Mobile Ad Protection.
github.com/jerryn70/GoodbyeAds • 277,778 entries • Updated 4 months ago   ×

EasyPrivacy
EasyPrivacy is an optional supplementary filter list that completely removes all forms of tracking from the internet, including web bugs, tracking scripts and information collectors, thereby protecting your personal data.
easylist.to • 45,294 entries • Updated 28 minutes ago   ×

Fanboy's Annoyance List
Fanboy's Annoyance List blocks Social Media content, in-page pop-ups and other annoyances; thereby substantially decreasing web page loading times and uncluttering them.
easylist.to • 839 entries • Updated 28 minutes ago   ×

NSABlocklist
Block all known NSA / GCHQ / C.I.A. / F.B.I. spying servers. Originally based on 2007 published Wikileaks documents and includes my own modifications from 2008, 2012, 2014 and 2015.
github.com/CHEF-KOCH/NSABlocklist • 8,197 entries • Updated 5 years ago   ×

Disconnect (Ads)
Free yourself from unwanted tracking. Enjoy a faster, safer internet.
disconnect.me • 2,701 entries • Updated 5 years ago   ×

AdAway
Blocking mobile ad providers and some analytics providers.
github.com/AdAway/adaway.github.io • 6,541 entries • Updated 2 years ago   ×

Automatically updated, moderated and optimized list for blocking ads, trackers and other online garbage.
github.com/notracking/hosts-blocklists • 419,961 entries • Updated 2 years ago

[ADD A BLOCKLIST]

Native Tracking Protection BETA
Block wide spectrum trackers — often operating at the operating system level — that track your activity on a device. This could include all the websites you visit, everything you type or your location at all times.

[ADD]

Block Disguised Third-Party Trackers
Automatically detect and block third-party trackers disguising themselves as first-party to circumvent recent browser's privacy protections like ITP.

🔵 Block Disguised Third-Party Trackers

Allow Affiliate & Tracking Links
Allow affiliate & tracking domains common on deals websites, in emails or in search results. Those usually only get called after manually clicking on a link.
🟣 Your IP address will automatically be hidden from those websites to preserve your privacy.

⚪ Allow Affiliate & Tracking Links
